

Inq-ITS runs entirely within a web browser over HTTPS (secure HTTP) and WSS (secure websockets). It requires stable connectivity to the Internet. To ensure full functionality, please look over the specifications below.

Web traffic: Inq-ITS uses cookies, AJAX calls, and websockets to maintain authentication, store student work, and alert teachers on student progress. **Please ensure that web traffic is allowed and not throttled for the following domains below.**

Service Name	Purpose	Domains to whitelist / enable web traffic
Inq-ITS Teacher, Student and Admin Portal	Access to all main system features	*.inqits.com *.*.inqits.com *@inqits.com *@inqits.org
Teacher Alerting Platform	Allows teachers to monitor students' progress as they work	*.inqits.com:4433 *.*.inqits.com:4433 Websockets technology must be enabled; check your network at websocketstest.com

Email: Please whitelist all emails originating from "@appendis.com" and "@inqits.com" to ensure that teachers may communicate with Inq-ITS support staff.

Browser Compatibility and Configuration: For all Inq-ITS services, Browsers must: (1) have cookies enabled, (2) have JavaScript enabled, (3) have ad blockers disabled for the site, and (4) have interfering browser extensions disabled. Shown below are the minimum requirements for each device.

Device	Minimum Requirements	Web Browsers Supported
